Expiration Date: 0000-00-00 00:00:00

Description

The pioneering weight-loss/slimming injection Saxenda is available at our Weight Management Clinic. If your BMI is over, you could be on your way to losing weight and lowering your BMI with the help of the MHRA approved weight loss injection. This GLP-1 receptor agonist helps limit your hunger and feel fuller for longer. You will have a full medical assessment at your first consultation with a health professional. A box of injection pens and accessories will be provided at first appointment along with a tailored 6 month treatment plan.
